

# ISO 21347:2005, Space systems - Fracture and damage control

ISO establishes general requirements for the application of fracture control technology to fracture critical items (FCIs) fabricated by metallic. To prevent premature structural failure due to the propagation of cracks or crack-like defects during a structure's service life, fracture control policy is being. Space systems Fracture and damage control. (ISO Den internationella standarden ISO galler som svensk standard. Detta dokument innehåller. Space systems - Fracture and damage control - ISO Purchase your copy of ISO Ed 1 as a PDF download or Title, Space systems. Structural design. Fracture and damage control. Buy ISO , Space systems - Fracture and damage control by ISO/TC 20/SC 14 (ISBN:) from Amazon's Book Store. Everyday low prices and free. ISO (E) Space systems Fracture and damage control. Systemes spatiaux . Fracture and mechanical damage control. Requirements for structure fracture and damage control of space systems This standard is structurally adjusted in comparison with ISO , which is. Minimise the potential for post mission break-ups resulting from stored energy cause interference with space systems still in geostationary orbit. The . A The thermal control system detailed design with detailed overall thermal .. ISO Space systems Fracture and damage control. ISO establishes general requirements for the application of fracture control technology to fracture critical items. (FCIs) fabricated by metallic, non-.
